Short Written Help guide

FONT: To use the same font as in the preview please download and install it before opening the project: http://www.dafont.com/lobster.font

MUSIC: To use the same music as in the preview, purchase it from this link: https://audiojungle.net/item/india/11312849 Import the short (40'') version & drop it in the "2 - EDIT OPTIONS - and final RENDER" composition.

General guide:

1. Replace the logo, in the "**1 - EDIT - DROP YOUR LOGO in here**" composition.
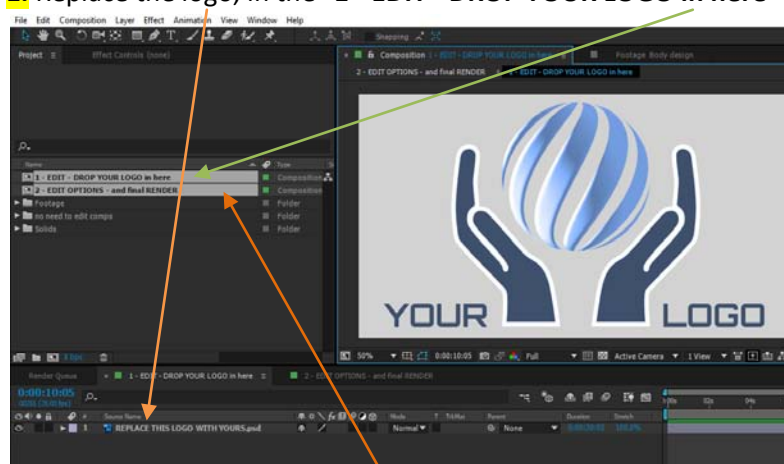

2. In the "2 - **EDIT OPTIONS - and final RENDER**" composition, select the first layer called **"CONTROLS" & press F3**. Select your **colors** and options on the effects panel.
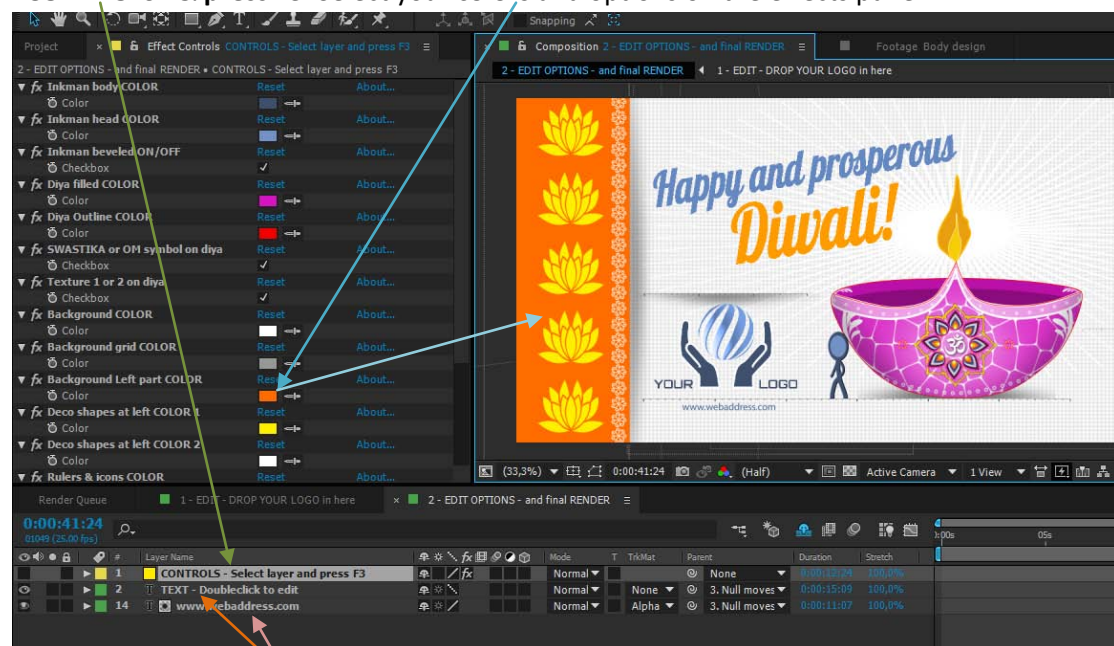

3. Doubleclick the **text layers** in the "2 - **EDIT OPTIONS - and final RENDER**" composition to edit them.

Rendering: Add final composition to the render queue (**or** to **media encoder queue** for AE versions that do not support H264 output). **Resize** if you need a smaller resolution. Keep audio output checked since the project already has sound effects (fireworks).

If you need **more help**, watch the **included video tutorial**, or please contact me through Videohive's contact form in my profile page. **Check more** AE projects & motion graphics files & **follow** my works here:
